Vision

Senior Backend Engineer with over 6 years of experience architecting highly scalable, data-intensive systems and event-driven microservices. Specializing in Python and Node.js, my vision is to lead engineering teams in designing robust server-side infrastructures and seamlessly integrating autonomous AI/LLM workflows that eliminate operational bottlenecks and deliver transformative business value.

Work Experience

Sofy.ai

Karachi, Pakistan (Remote)

SENIOR SOFTWARE ENGINEER – TEAM LEAD

July 2022 – Present

- Architected the transition from a monolithic application to a highly scalable **Microservices** architecture using **Node.js**, **TypeScript**, and **Python**, improving modularity and reducing deployment times by an average of 80%.
- Product: Sofy Web Agent** – Spearheaded the backend architecture and development of an autonomous system utilizing **Python**, **LangChain**, and **Playwright** for complex web automation tasks.
- Implemented robust event-driven messaging with **Azure Service Bus**, replacing legacy polling mechanisms and managing high-throughput communication for over 100k+ daily events.
- Engineered **domain-specific agents** and semantic routing systems in Python, encapsulating deep business logic to improve AI decision accuracy for enterprise workflows.
- Developed and deployed an **MCP server** written in Python, enabling seamless integration of internal capabilities with external, compatible agentic systems.
- Migrated core data modules to **MongoDB**, optimizing data retrieval performance, and established rigorous **TDD** and code review workflows to ensure reliable backend delivery.

SOFTWARE ENGINEER

Sep 2020 – Jul 2022

- Engineered robust middleware APIs and microservices utilizing **Python (Flask)**, **Node.js**, and **TypeScript** to support complex business workflows and data processing.
- Designed and integrated highly performant database solutions using **MS SQL**, and implemented **Redis** caching layers to drastically reduce latency and optimize data retrieval.
- Led the front-end migration from **Angular 6** to **Angular 11**, improving system maintainability, and managed end-to-end integration of backend APIs with front-end applications.
- Collaborated on architectural planning, sprint execution, and conducted rigorous code reviews to ensure quality and alignment across the team.

Skynners Private Limited

Karachi, Pakistan

CO-FOUNDER

2017 – 2020

- Architected and delivered **15+ scalable backend systems** and custom software solutions using **Python** and **Node.js** tailored to enterprise client needs, overseeing the full SDLC.
- Designed and deployed highly available, event-driven server architectures on **AWS** via Docker, successfully supporting high-traffic applications and ensuring 99.9% uptime.
- Pioneered automated CI/CD pipelines, streamlining deployment workflows and reducing manual errors by 80% across all backend processes.
- Product: AAB** – Led technical architecture and backend engineering for an in-house startup initiative:
 - Built a high-throughput, horizontally scalable **Node.js** and **PostgreSQL** REST API on **Supabase**, seamlessly processing thousands of concurrent transactions daily.
 - Engineered the core admin portal and guided the development of the **React Native** client application, rapidly acquiring **1,000+ early-stage users** within three months.
 - Directed the go-to-market strategy and presented the robust server scaling architecture at regional conferences, successfully securing seed funding.

Skills

Backend & Languages

Python (Flask, FastAPI), Node.js (Express), TypeScript, JavaScript, SQL

Architecture & AI

Microservices, RESTful APIs, Event-Driven Systems, LLMs, LangChain, Agentic Workflows

Databases & Cloud

PostgreSQL, MS SQL, MongoDB, Redis, Azure (Service Bus), AWS, Supabase

DevOps & Tools

Docker, CI/CD, Git, Azure DevOps, Jira, Playwright, Pytest, Jest, TDD

Education

FAST - National University of Computer and Emerging Sciences

Karachi, Pakistan

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

August 2016 - July 2020
